

# Jacopo Recipe

This recipe features a bold design with a wide two-column layout that displays the ingredients and methods. Methods are numbered with eye-catching black dots and ingredients are in a subdued italic to the left. The template accomodates a recipe description at the top, extra information at the bottom and servings, preparation time, cooking time and difficulty information.

## Description

This recipe features a bold design with a wide two-column layout that displays the ingredients and methods. Above the large bold title is a subdued description of the recipe, useful for giving a history of the recipe or additional information about it. Below the title is a neat block

## What Is LaTeX?

preparation and cooking times and the recipe difficulty. Ingredients and steps of preparation (methods) are displayed in two columns, the widths of which can be easily adjusted if required. Ingredients are in a subdued smaller italic so as not to draw attention from the more important methods which are automatically numbered in distinct black dots on the right. Finally, some tips, storage guidelines, variations or other useful information can be specified under the methods.

The template is very flexible and the only things that must be specified are the title, ingredients and methods. Everything else will simply disappear if not required and the layout of the recipe will adjust accordingly.

SERVES 4PREP 25 minsCOOKING 40 minsDIFFICULTY Beginner

1 *tblsp* olive oil

20g butter

2 brown onions, halved,  
finely chopped

2 garlic cloves, crushed

500g beef mince

145g (1/2 cup) tomato paste

250mL (1 cup) dry red wine

2 x 400g cans of diced tomatoes

1 *tblsp* dried oregano

3 dried bay leaves

Salt and freshly ground  
black pepper

1/3 cup fresh parsley, loosely  
packed, coarsely chopped

375g dried thin spaghetti

80g parmesan, to serve

❶ Heat oil and butter in a large saucepan over medium-high heat. Add onion and garlic and cook, stirring, for 3 minutes or until onion softens. Add the mince and cook, stirring with a wooden spoon to break up any lumps, for 5 minutes or until the mince changes color.

❷ Add the tomato paste, wine, tomato, oregano and bay leaves, and bring to the boil. Reduce heat to medium and simmer, stirring occasionally, for 1 hour or until sauce thickens. Taste and season with salt and pepper. Stir in the parsley.

❸ Meanwhile, cook the spaghetti in a large saucepan of salted boiling water following packet directions until al dente. Drain.

❹ Divide the spaghetti among bowls and spoon over bolognese sauce. Grate over the parmesan and serve immediately.

You can freeze this bolognese sauce for up to 2 months. Cool to room temperature, then place individual portions or whole quantity in airtight containers or freezer bags and expel air. Label, date and freeze. Place in the fridge overnight to thaw.

## Recipe Information Commands

Apart from the recipe ingredients and methods, all other recipe information is set in the RECIPE INFORMATION block at the top of the template. A number of commands are present there for different parts of the recipe, such as `\recipedescription{}` for the italic description that appears above the title. Each command takes a single parameter and all of them can be empty except the recipe title. Note that the commands must always be present, so don't comment them out or remove them if they are not required.

## Recipe Element Commands

A single custom command is present in the template for outputting the header of the recipe.

`\outputrecipeheader` This command outputs the recipe description, title and servings/preparation time/cooking

specified in the RECIPE INFORMATION block. Don't remove this command or change its position in the template. If no description or recipe information is specified, it will automatically adjust the layout to remove them and still look good.

## Specifying Ingredients and Methods

The ingredients and methods are output in a two-column layout with fixed widths. You can change these widths by finding the `\columnratio` command and changing the two values within it. It is recommended to have them sum to 1 so the values correspond to percentage widths of the columns.

The two-column layout is activated with `\begin{paracol}{2}` and if there are more ingredients or methods than fit on 1 page, the recipe will automatically split onto additional pages as required.

Recipe ingredients are housed in a `recipeingredients` environment and each ingredient is specified in a `\ingredient{}` command in the single parameter. New lines can be added within ingredients to make multi-

Recipe methods are housed in a [Newest Templates](#)

[LaTeX Typesetting Service](#)

`recipemethods` environment and each method is specified in a `\method{ }` command in the single parameter. It is not recommended to use new lines in methods but instead to break up the method into more steps with short sentences in each one. This makes the recipe easier to follow and gives breathing space for the text.
