

Morgana Recipe

This recipe template features a thin two-column layout to neatly display ingredients and methods side by side. A defining feature of the template is the eye-catching red heading for a short tagline or category. Additionally, the bold description section allows you to summarize the recipe's history.

Description

This recipe template features a thin two-column layout to neatly display ingredients and methods side by side. Underneath the large title is a subdued subtitle that acts to describe or elaborate on the title. Next is a large red heading which is useful to categorize the recipe or give it a bold tagline. The template makes use of thin dashed rules to separate the major elements and the

What Is LaTeX?

information about it. Ingredients and steps of preparation (methods) are displayed in two columns, the widths of which can be easily adjusted if required. Ingredients are in a subdued smaller italic so as not to draw attention from the more important methods which are automatically numbered on the right. The number of servings, preparation time, cooking time and difficulty can be specified under the ingredients. Finally, some tips, storage guidelines, variations or other useful information can be specified under the methods.

The template is very flexible and the only things that must be specified are the title, ingredients and methods. Everything else will simply disappear if not required and the layout of the recipe will adjust accordingly.

Spaghetti bolognese

Rag alla bolognese (Italian)

THE FAMOUS ITALIAN DISH

Bolognese sauce, known in Italian as rag alla bolognese, is a meat-based sauce originating from Bologna, Italy. In Italian cuisine, it is customarily used to dress "tagliatelle al rag" and to prepare "lasagne alla bolognese".

1 tsp olive oil

20g butter

2 brown onions, halved, finely chopped

2 garlic cloves, crushed

500g beef mince

145g (1/2 cup) tomato paste

250ml (1 cup) dry red wine

2 x 400g cans of diced tomatoes

1 tsp dried oregano

3 dried bay leaves

Salt and freshly ground black pepper

1/3 cup fresh parsley, loosely packed, coarsely chopped

375g dried thin spaghetti

80g parmesan, to serve

Serves - 4

Prep - 25 mins

Cooking - 40 mins

Difficulty - Easy

1. Heat oil and butter in a large saucepan over medium-high heat. Add onion and garlic and cook, stirring, for 3 minutes or until onion softens. Add the mince and cook, stirring with a wooden spoon to break up any lumps, for 5 minutes or until the mince changes color.

2. Add the tomato paste, wine, tomato, oregano and bay leaves, and bring to the boil. Reduce heat to medium and simmer, stirring occasionally, for 1 hour or until sauce thickens. Taste and season with salt and pepper. Stir in the parsley.

3. Meanwhile, cook the spaghetti in a large saucepan of salted boiling water following packet directions until *al dente*. Drain.

4. Divide the spaghetti among bowls and spoon over bolognese sauce. Grate over the parmesan and serve immediately.

You can freeze this bolognese sauce for up to 2 months. Cool to room temperature, then place individual portions or whole quantity in airtight containers or freezer bags and expel air. Label, date and freeze. Place in the fridge overnight to thaw.

Recipe Information Commands

Apart from the recipe ingredients and methods, all other recipe information is set in the RECIPE INFORMATION block at the top of the template. A number of commands are present there for different parts of the recipe, such as `\recipedescription{}` for the bold description that appears above the ingredients and methods. Each command takes a single parameter and all of them can be empty except the recipe title. Note that the commands must always be present, so don't comment them out or remove them if they are not required.

Recipe Element Commands

Several custom commands are present in the template for outputting various elements of the recipe.

`\outputrecipeheader` This command outputs the recipe title, subtitle and heading. It does not take

INFORMATION block. Don't remove this command or change its position in the template. If no subtitle or heading are specified, it will automatically adjust the layout to remove them and still look good.

Newest Templates

LaTeX Typesetting Service

`\outputrecipedescription` This command outputs the recipe description between two horizontal rules. It does not take any parameters and uses the information specified in the RECIPE INFORMATION block. Don't remove this command or change its position in the template. If no description is specified, it will automatically adjust the layout to remove it and still look good.

Specifying Ingredients and Methods

The ingredients and methods are output in a two-column layout with fixed widths. You can change these widths by finding the `\columnratio` command and changing the two values within it. It is recommended to have them sum to 1 so the values correspond to percentage widths of the columns. The two-column layout is activated with `\begin{paracol}{2}` and if there are more ingredients or methods than fit

Recipe ingredients are housed in a [Newest Templates](#)

[LaTeX Typesetting Service](#)

`recipeingredients` environment and each ingredient is specified in a `\ingredient{}` command in the single parameter. New lines can be added within ingredients to make multi-line ingredients wrap neatly with the standard `\\`.

Recipe methods are housed in a `recipemethods` environment and each method is specified in a `\method{}` command in the single parameter. It is not recommended to use new lines in methods but instead to break up the method into more steps with short sentences in each one. This makes the recipe easier to follow and gives breathing space for the text.
