

Description Sign

This sign is primarily designed to display a large amount of information or instructions to the viewer about an inconvenience, notice, event or something similar. It features 4 elements: the sign title summarizes a key fact, the subtitle acts as a notice, the description text provides a lot more explanation and the additional text gives space for an apology or to state who to contact about the content of the sign.

Description

This sign is primarily designed to display a large amount of information or instructions to the viewer about an inconvenience, notice, event or something similar. It consists of 4 distinct elements which facilitate this. The main title at the top is large and

the subtitle which acts as a notice or call to action, such as that facilities have been moved to another building. Then comes several paragraphs of description text which explain the situation or give guidance for what the viewer should do. Finally, the additional text on the bottom can be used for an apology or to state who to contact about the content of the sign.

Building Under Renovation

Facilities Moved to Building 42

Renovation will continue through August if weather permits. In the event of delays, alternative office spaces and facilities will be provisioned. If you have any questions about how you will be impacted, please contact the facility manager.

The shared staff kitchen and lunch room are now on level 1C of B42, shared with the Engineering Department.

Showers are now on basement level 3 next to the elevators.

Smoking is now allowed only on the balcony on level 14 or in Albert Park across the road.

All facility tours are postponed until renovation is complete.

Apologies for any inconvenience caused.

Usage Guide

Compilation

This template compiles with standard pdflatex. There are no special requirements outside of packages that are supplied with a full distribution of TeX.

Sign Content Commands

Several custom commands are present in the template for outputting the four parts of the sign.

`\signtitle`

This command takes a single parameter for the main sign title at the top. The text you enter will split to new lines if it is too long for one line, but it is not recommended to have more than three lines for this text. You may

`\signsubtitle`

LaTeX Typesetting Service

takes the bold subtitle that appears under the title in its single parameter.

You may specify new lines manually to space text neatly with the standard

`\\`

. Leave this command empty (i.e.

`\signsubtitle{}`

) if this text is not required.

`\descriptiontext`

This command takes a single parameter for the paragraphs of description, explanation or instruction text in the middle of the sign. Make sure to leave empty lines between each new paragraph to ensure proper spacing. You may specify new lines manually to space text neatly with the standard `\\`.

`\additionaltext`

This command takes a single parameter for the additional text text on the bottom of the sign. Text entered will be italicized automatically. You may specify new lines manually to space text neatly with the standard `\\`. Leave this command empty (i.e. `\additionaltext{}`) if this text is not required.

Sign Settings Commands

the four sign elements. It is important to choose the correct sizes for your sign text in order to make the sign content stand out effectively.

Newest Templates

LaTeX Typesetting Service

`\signtitlefontsize` This command (length) sets the font size of the main sign title, specified in points, e.g. 70pt. This should be a large value to draw the viewer's eye to the sign.

`\signsubtitlefontsize` This command (length) sets the font size of the bold subtitle, specified in points, e.g. 28pt. This should be much smaller than the title font size, but large enough for the subtitle to stand out.

`\descriptiontextfontsize` This command (length) sets the font size of the description text in the middle of the sign, specified in points, e.g. 18pt. This should be smaller than the subtitle to ensure that the subtitle stands out, but big enough for the amount of text to be easily readable.

`\additionaltextfontsize` This command (length) sets the font size of the additional text at the bottom of the sign, specified in points, e.g. 20pt. It is recommended to set a size for this
