

Classicthesis Typographic Thesis

This template has been designed as a homage to the Elements of Typographic Style. As such, it has an air of efficiency and optimal design. It is suitable for any high-level degree thesis such as for a PhD, Masters or Honors. Sections within the thesis are clearly separated in a consistent way, as are sections within each chapter. The default structure of the thesis proceeds in the following order: title page, dedication, abstract, publications, acknowledgements, contents, list of tables/figures/listings, acronyms, content chapters, appendices, bibliography, colophon and declaration.

Description

style. As such, it has an air of efficiency and optimal design. It is suitable for any high-level degree thesis such as for a PhD, Masters or Honors. Sections within the thesis are clearly separated in a consistent way, as are sections within each chapter. The default structure of the thesis proceeds in the following order: title page, dedication, abstract, publications, acknowledgements, contents, list of tables/figures/listings, acronyms, content chapters, appendices, bibliography, colophon and declaration.

The template includes a chapter to get you started using the template and provides several useful suggestions which are worth reading. Also included are two chapters showing the capability of the template to give an idea of how it will look with your content.

Important note: this template comes as a zip file with multiple files and folders within it. It is a good idea to familiarize yourself with each of the included files and to read the introductory chapter so you are well equipped to make use of this template.

to your specifications.

INTRODUCTION

This template for $\LaTeX$ has two goals:

1. Provide students with an easy-to-use template for their Master's or PhD thesis (though it might also be used by other types of authors for reports, books, etc.).
2. Provide a classic, high-quality typographic style that is inspired by Bringhurst's "*The Elements of Typographic Style*" [2].

The bundle is configured to run with a *full* $\text{\TeX}$ or $\text{\TeX}$ Live installation right away and, therefore, it uses only freely available fonts.

People interested only in the nice style and not the whole bundle can now use the style stand-alone via the file `classicthesis.sty`. This works now also with "plain" $\LaTeX$.

As of version 3.0, `classicthesis` can also be easily used with $\text{\LaTeX}$ thanks to Nicholas Mariette and Ivo Pletikosić. The $\text{\LaTeX}$ version of this manual will contain more information on the details.

This should enable anyone with a basic knowledge of $\text{\LaTeX}$ or $\text{\LaTeX}$ to produce beautiful documents without too much effort. In the end, this is my overall goal: more beautiful documents, especially theses, as I am tired of seeing so many ugly ones.

The whole template and the used style is released under the GNU General Public License.

If you like the style then I would appreciate a postcard:

André Miede
Detmolder Straße 32
31737 Rinteln
Germany

The postcards I received so far are available at:

<http://postcards.miede.de>

So far, many theses, some books, and several other publications have been typeset successfully with it. If you are interested in some typographic details behind it, enjoy Robert Bringhurst's wonderful book.

IMPORTANT NOTE: Some things of this style might look unusual at first glance, many people feel so in the beginning. However, all things are intentionally designed to be as they are, especially these:
