

Freeman CV/Resume

This flexible template arranges your categories of skills and achievements in two prominent columns. It features elegant typography and subdued use of colors to highlight the most important elements at a glance.

Description

This curriculum vitae or resume template fits a large amount of information in a concise two-column layout without feeling too packed. When your content grows too large, it will be automatically pushed to the next page, as you can see with the template content in the previews below. Sections are cleanly delimited and can be easily moved around to highlight the parts of your experience and skills that are most important to the job you are applying

Dr. Gordon Freeman

Curriculum Vitae

DOCTORAL RESEARCH

"Observation of Einstein-Podolsky-Rosen Entanglement on Supraquantum Structures by Induction Through Nonlinear Transuranic Crystal of Extremely Long Wavelength Pulse from Mode-Locked Source Array"

My research examined the use of ELW pulses from a mode-locked source array inducted through transuranic crystals to observe entanglement on supraquantum structures. Theoretical advancements included prediction of quantum resonance phenomena including the possibility of resonance cascades. I was motivated to conduct this doctoral research due to my passion for teleportation of matter and I believe I have laid the foundation for further experimental validation and development of practical outcomes.

WORK EXPERIENCE

Black Mesa Research Facility
Team Leader (Anomalous Materials)

As part of this promotion, I began conducting nuclear and subatomic research in the Anomalous Materials department. My team and I are particularly interested in dimensionality and its interaction with space-time. The focus is on practical outcomes and applications in teleportation and communication with distal locations.

Black Mesa Research Facility
Level 3 Research Associate

This position involved transitioning from purely theoretical work to experimental applications utilizing the immense resources of Black Mesa. The transition required an initial learning curve in hazard containment, health and safety procedures and operating experimental infrastructure. Manipulating valves, carts, buttons, levers, etc considerably increased my physical fitness.

WashPests Limited
Pest Control Technician

In this summer job I was tasked with helping eradicate pests from industrial areas. Work involved setting traps, spraying and physical eradication. I received praise for reaching difficult areas and my innovative use of a crowbar to assist in my work.

EDUCATION

1986 – 1990 Doctor of Philosophy
 Theoretical Physics
 Massachusetts Institute of Technology

1985 Master of Science
 FIRST CLASS HONORS
 Theoretical Physics
 Massachusetts Institute of Technology

1982 – 1984 Bachelor of Physics
 Department of Physics
 The University of Washington

AWARDS

1985 Faculty of Science Masters Scholarship
 Massachusetts Institute of Technology

1983 Top Achiever Award – Physics
 The University of Washington

COMPUTER SKILLS

BEGINNER	Java, MS DOS
INTER-MEDIATE	JavaScript, Python, HTML, C, Microsoft Windows
EXPERT	Perl, Unix, BTE _X

COMMUNICATION SKILLS

CONFERENCES	Oral Presentation at the Annual Theoretical Physics Conference
POSTERS	Poster at the Meeting of the American Physical Society – 1985

SKILLS

Goal Oriented

I believe in action over long-winded discussions. I value everyone's viewpoints and use my judgement to ultimately act based on consensus to achieve goals quickly and efficiently.

Physical Dexterity

Manual manipulation of experimental equipment and working within Black Mesa (e.g. the Hazard Course) has contributed to an enjoyment of working with my hands.

Passionate

I have been interested in theoretical physics such as quantum mechanics and relativity from an early age. My education and research have cemented this interest into

Usage Guide

Compilation

This template needs to be compiled with XeLaTeX due to the custom fonts it uses. It contains a line in the header that should make this happen automatically, but if it doesn't for you, set your LaTeX editor to compile with XeLaTeX each time you open the template. Alternatively, if you compile via the command line, use the `xelatex` command instead of `pdflatex`.

Fonts

This template uses the following fonts: EB Garamond, Freebooter Script, Libertinus Sans and FontAwesome. All four are supplied with the template so you don't have to worry about installing them on your system. The licenses are supplied with the template and each has been generously licensed for

the template.

Moving and Deleting CV Sections

You may wish to move sections around to highlight the important parts of your experience and skills closer to the top.

To do this, just copy the entire section block starting with the all caps commented section header, e.g.

```
%
```

```
-----
```

```
% WORK EXPERIENCE
```

```
%
```

```
-----
```

all the way to the next all caps section header. You can safely paste this between any other sections in the template and the layout will automatically adjust to accomodate it.

Repurposing Sections

The template comes with a number of different section types that you can repurpose to suit any content you would like to add. For a large body of work you would like to describe in depth, such as a thesis or book you have written, there is the “Doctoral Research” section with an emphasised title and paragraph

What Is LaTeX?

experience, there is the “Work Experience” section that clearly highlights your role at a number of locations through time. The “References” section is useful to list personal information of individuals or companies. The “Education” section can be used as a succinct version of the Work Experience section that foregoes the description for a short list of titles, locations and dates. For a longer description of yourself, such as your personality, major achievements or interests, there is the “Skills” section that has a small heading and paragraph of descriptive text. The “Publications” section can be repurposed for any serial list of published works such as newspaper articles or magazines. Finally, the two-column table layout seen in the “Awards”, “Computer Skills” and “Communication Skills” sections produces a generic small caps header in the left column and a list in the right column — this can be used for listing succinct information about yourself or your achievements.

Some of these sections use custom commands to make your life easier. All commands are documented in the template and blank versions are

Spanning Multiple Pages

If your content doesn't fit on one page, as in the template, it will automatically wrap to the next page at the next reasonable location. LaTeX will decide where this should occur, and if you don't like this occurs, you can simply add a `\newpage` command to wherever you would like to manually break to the next page. Be wary that changing content upstream of such a break will shift its position up or down. Also note that page breaks cannot be added inside tables so you will need to end the table before adding a page break.

Icons

This template uses the FontAwesome icons in the colored box at the top right. Many icons are available and you can find a PDF in the Fonts folder that has examples of all of them along with the command to add them. The colored box already has 2 commented lines to include a GitHub or LinkedIn profile link, so just follow this structure with any other lines you'd like to add.
