

Freeman Cover Letter

This cover letter features the same two-column top section as the Freeman CV and should be used as its pair when applying for jobs.

Description

This cover letter features the same two-column top section as the Freeman CV and should be used as its pair when applying for jobs. The layout of the cover letter body features the potential employer and job title you are applying for at the top, then the body of the letter. You may choose to include address or contact information of the hiring manager above the salutation line, but this is increasingly not necessary with modern job applications.

What Is LaTeX?

Black Mesa Research Facility — ~~Official (Non-Security Material)~~

Dear Hiring Manager,

PARAGRAPH ONE: State the reason for the letter, name the position or type of work you are applying for and identify the source from which you learned of the opening.

PARAGRAPH TWO: Indicate why you are interested in the position, the company, its products, services – above all, what you can do for the employer. If you are a recent graduate, explain how your academic background makes you a qualified candidate for the position. If you have practical work experience, point out specific achievements or unique qualifications not to repeat the same information the reader will find in the resume. Refer the reader to the enclosed resume or application which summarizes your qualifications, training, and experiences. The purpose of this section is to strengthen your resume by providing details which bring your experiences to life.

PARAGRAPH THREE: Request a personal interview and indicate your flexibility as to the time and place. Repeat your phone number in the letter and offer assistance to help in a speedy response. For example, state that you will be in the area where the company is located on a certain date and would like to set up an interview. Alternatively, state that you will be available on a certain date to set up an interview. End the letter by thanking the employer for taking time to consider your credentials.

Sincerely,

Dr. Gordon Freeman, PhD

Usage Guide

LaTeX Templates

Template Categories

What Is LaTeX?

XeLaTeX due to the custom fonts it uses.

Newest Templates

LaTeX Typesetting Service

It contains a line in the header that should make this happen automatically, but if it doesn't for you, set your LaTeX editor to compile with XeLaTeX each time you open the template.

Alternatively, if you compile via the command line, use the `xelatex` command instead of `pdflatex`.

Fonts

This template uses the following fonts: EB Garamond, Freebooter Script, Libertinus Sans and FontAwesome. All four are supplied with the template so you don't have to worry about installing them on your system. The licenses are supplied with the template and each has been generously licensed for redistribution. All font files and licenses are in the Fonts folder once you unzip the template.

Icons

This template uses the FontAwesome icons in the colored box at the top right. Many icons are available and you can find a PDF in the Fonts folder that has examples of all of them along with the command to add them. The colored box
