What Is LaTeX?

Elsevier journals can be found [here](#).

Elsevier explicitly state that this class

and templates are their preferred format for articles submitted to all of their journals.

The package distributed here contains the template file elsarticle-template.tex, a number of bibliography styles (*.bst), the elsarticle class documentation and an example bibliography file (*.bib).

Journals have different preferred referencing styles and you can select which bibliography style you would like to use within the template file. Consult the documentation PDF and commented lines in the template file for information on how to correctly write your article content. For additional instructions and information, see the [LaTeX Instructions for authors at Elsevier's website](#).
