

PNAS Journal

The Proceedings of the National Academy of Sciences of the United States of America (PNAS) allows authors to submit their manuscript formatted in LaTeX to the PNAS Journal. For this, they provide a template which contains the structure and reference style they would like for submissions. The PNAS LaTeX template features a two-column layout and mirrors the layout seen in final publications released by PNAS.

Description

The Proceedings of the National Academy of Sciences of the United States of America (PNAS) allows authors to submit their manuscript formatted in LaTeX to the PNAS Journal. For this, they provide a template which contains the

LaTeX Templates offers a **paid typesetting service** to create LaTeX templates to your specifications.

[Find Out More](#)

The PNAS LaTeX template features a two-column layout and mirrors the layout seen in final publications released by PNAS. This allows authors to determine the exact length of their manuscripts as they will appear if accepted. The template is highly structured so each piece of information is clearly separated into sections for easy editing. The text in the template is self-documenting regarding requirements and recommendations for your article, but PNAS have a additional instructions for authors using this template which you can view [here](#).

What Is LaTeX?

Submission to PNAS using Overleaf

Author One^{a,c,1}, Author Two^{b,1,2}, and Author Three^a
^aAffiliation One; ^bAffiliation Two; ^cAffiliation Three
 This manuscript was compiled on January 26, 2019

1 Please provide an abstract of no more than 250 words in a single
2 paragraph. Abstracts should explain to the general reader the major
3 contributions of the article. References in the abstract must be cited
4 in full within the abstract itself and cited in the text.

Keyword 1 | Keyword 2 | Keyword 3 | ...

5 This PNAS journal template is provided to help you write
6 your work in the correct journal format. Instructions for
7 use are provided below.
8 Note: please start your introduction without including the
9 word "Introduction" as a section heading (except for math ar-
10 ticles in the Physical Sciences section); this heading is implied
11 in the first paragraphs.

12 Guide to using this template on Overleaf
13 Please note that whilst this template provides a preview of the
14 typeset manuscript for submission, to help in this preparation,
15 it will not necessarily be the final publication layout. For
16 more detailed information please see the PNAS Information
17 for Authors.
18 If you have a question while using this template on Overleaf,
19 please use the help menu ("??") on the top bar to search for help
20 and tutorials. You can also contact the Overleaf support team
21 at any time with specific questions about your manuscript or
22 feedback on the template.

23 Author Affiliations. Include department, institution, and complete address, with the ZIP/postal code, for each author. Use lower case letters to match authors with institutions, as shown in the example. Authors with an ORCID ID may supply this information at submission.

24 Submitting Manuscripts. All authors must submit their articles at PNAScentral. If you are using Overleaf to write your article, you can use the "Submit to PNAS" option in the top bar of the editor window.

25 Format. Many authors find it useful to organize their manuscripts with the following order of sections: Title, Author Affiliation, Keywords, Abstract, Significance Statement, Results, Discussion, Materials and methods, Acknowledgments, and References. Other orders and headings are permitted.

26 Manuscript Length. PNAS generally uses a two-column format averaging 67 characters, including spaces, per line. The maximum length of a Direct Submission research article is six pages and a Direct Submission Plus research article is ten pages including all text, spaces, and the number of characters displaced by figures, tables, and equations. When submitting tables, figures, and/or equations in addition to text, keep the text for your manuscript under 39,000 characters (including spaces) for

Newest Templates

Direct Submissions and 72,000 characters (in for Direct Submission Plus.

References. References should be cited in nunt they appear in text; this will be done automatic e.g. (1) and (2, 3). All references should be i main manuscript file.

Data Archival. PNAS must be able to archive th to a published article. Where such archiving deposition of data in public databases, such as rayExpress, Protein Data Bank, Unidata, and in the Information for Authors, is acceptable.

Language-Editing Services. Prior to submissio believe their manuscripts would benefit from pi ing are encouraged to use a language-editing ser www.pnas.org/site/authors/language-editing: does not take responsibility for or endorse thee their use has no bearing on acceptance of a i publication.

Digital Figures. Only TIFF, EPS, and high-r for Mac or PC are allowed for figures that wil main text, and images must be final size. Auth U3D or PRC files for 3D images; these must b by 2D representations in TIFF, EPS, or high-i format. Color images must be in RGB (red, gre Include the font files for any text.

Figures and Tables should be labelled and re standard way using the \label{} and \ref{} Figure 1 shows an example of how to insert figure. To insert a figure wider than one colu the \begin{figure*}...\end{figure*} enviro ures wider than one column should be sized to

Significance Statement
 Authors must submit a 120-word maximum sta the significance of their research paper written at standable to an undergraduate educated scientis field of speciality. The primary goal of the Signi ment is to explain the relevance of the work in to a broad readership. The Significance Statem the paper itself and is required for all research p
