

# Royal Society of Chemistry

The Royal Society of Chemistry provides two LaTeX templates for authors to submit articles and communications to all journals they publish. Each template includes dummy content which provides an example for authors for how to write their paper in LaTeX.

## Description

The Royal Society of Chemistry provides two LaTeX templates for authors to submit articles and communications to all journals they publish. Each template includes dummy content which provides an example for authors for how to write their paper in LaTeX. At the submission stage, author(s) are requested to provide a PDF of the manuscript typeset in LaTeX including all figures as well as the LaTeX files. Supplementary information should

Journal Name

ARTICLE TYPE

Cite this: DOI: 00.0000/xxxxxxxxxx

This is the title<sup>†</sup>

Full Name,<sup>a</sup> Full Name,<sup>b‡</sup> and Full Name<sup>a</sup>

Received Date

Accepted Date

DOI: 00.0000/xxxxxxxxxx

The abstract should be a single paragraph which summarises the content of the article in the abstract should be written out in full e.g. [Surname et al., Journal Title, ...]

The main text of the article<sup>1</sup> should appear here.

0.1 This is the subsection heading style

Section headings can be typeset with and without numbers.<sup>2</sup>

0.1.1 This is the subsection style.

These headings should end in a full point.

0.1.1.1 This is the next level heading. For this level please use \paragraph. These headings should also end in a full point.

1 Graphics and tables

1.1 Graphics

Graphics should be inserted on the page where they are first mentioned (unless they are equations, which appear in the flow of the text).<sup>3</sup>

EXAMPLE IMAGE

Fig. 1 An example figure caption.

1.2 Tables

Tables typeset in RSC house style do not include vertical lines. Table footnote symbols are lower-case italic letters and are typeset

at the bottom of the table. Table captions do point.<sup>4,5</sup>

Table 1 An example of a caption to accompany a

| Header one (units) | Header two |
|--------------------|------------|
| 1                  | 2          |
| 4                  | 5          |
| 7                  | 8          |
| 10                 | 11         |

Adding notes to tables can be complicated. The method is to generate these manually.<sup>6</sup>

2 Equations

Equations can be typeset inline e.g.  $y = mx + c$  and without numbers:

$$A = \pi r^2$$

$$\frac{\gamma}{Ex} r^2 = 2r$$

You can also put lists into the text. You can numbered lists of almost any kind. The mhchem package can be used so that formulae are easy to input:  $\text{H}_2\text{SO}_4$ .

For footnotes in the main text of the article footnotes to avoid duplicate symbols. e.g. \footnote{...}. The corresponding author \* counts as footnote 2, e.g. if there is no ESI, please start ESI is cited in the title please start at [num]=1 cite the ESI within the main body of the text u

3 Conclusions

The conclusions section should come in this section the article, before the Conflicts of interest statement.

<sup>a</sup> Address, Address, Town, Country. Fax: XX XXXX XXXX; Tel: XX XXXX XXXX; E-mail: xxx@aaa.bbb.cc

<sup>b</sup> Address, Address, Town, Country

<sup>†</sup> Electronic Supplementary Information (ESI) available: [details of any supplementary information available should be included here]. See DOI: 00.0000/00000000.

<sup>‡</sup> Additional footnotes to the title and authors can be included e.g. 'Present address:' or 'These authors contributed equally to this work' as above using the symbols: ‡, §, and \*. Please place the appropriate symbol next to the author's name and include a \Footnotetext entry in the correct place in the list.

<sup>§</sup> Footnotes should appear here. These might include comments central to the matter under discussion, limited experimental crystallographic data.
