

Science Journal

The Science Journal allows authors to submit their manuscripts formatted in LaTeX. For this, they provide a template which contains the structure and reference style they would like for submissions. The template provided here includes a filled-out example article, the Science bibliography style, example bibliography and the scicite package used for formatting the reference numbers. The template is extensively commented and sectioned to make writing your Science manuscript easy.

This document presents a number of hints about how to set up your *Science* paper in L^AT_EX. We provide a template file, `scifile.tex`, that you can use to set up the L^AT_EX source for your article. An example of the style is the special `{sciabstract}` environment used to set up the abstract you see here.

Introduction

In this file, we present some tips and sample mark-up to assure your L^AT_EX file of the smoothest possible journey from review manuscript to published *Science* paper. We focus here particularly on issues related to style files, citation, and math, tables, and figures, as those tend to be the biggest sticking points. Please use the source file for this document, `scifile.tex`, as a template for your manuscript, cutting and pasting your content into the file at the appropriate places.

Science's publication workflow relies on Microsoft Word. To translate $\text{\LaTeX}$ files into Word we use an intermediate MS-DOS routine (*I*) that converts the $\text{\TeX}$ source into HTML. The routine is generally robust, but it works best if the source document is clean $\text{\LaTeX}$ without a
