

Ryo Menu

This menu template features a bold design with eye-catching high contrast menu items. Each menu item can be qualified with a description to list ingredients or notes and a price can be specified to the right. The menu aims for a clean and minimalist look suited to a modern cafe, bar or restaurant.

Description

This menu template features a bold design suited to a modern cafe, bar or restaurant. The menu title and item titles are in a high contrast large bold font to immediately leap out of the page at the viewer. Each menu item features an optional description underneath which can be used to list ingredients or provide notes. A price can also be specified to the right of the title.

Usage Guide

Compilation

This template needs to be compiled with XeLaTeX due to the custom fonts it uses. It contains a line in the header that should make this happen automatically, but if it doesn't for you, set your LaTeX editor to compile with XeLaTeX each time you open the template. Alternatively, if you compile via the command line, use the `xelatex` command instead of `pdflatex`.

Menu Settings Commands

Custom commands are present in the template for specifying the font sizes of the four menu elements and the currency symbol used. It is important to choose the correct size for your menu text in order to make the menu items stand out effectively.

the menu item titles, specified in points, e.g. 24pt.

Newest Templates

LaTeX Typesetting Service

`\menuitempricefontsize` This

command (length) sets the font size of the menu item prices, specified in points, e.g. 17pt.

`\menuitemdescriptionfontsize`

This command (length) sets the font size of the menu item descriptions, specified in points, e.g. 12pt.

`\extrainfofontsize` This

command (length) sets the font size of the extra information text at the bottom of the menu, specified in points, e.g. 12pt.

`\determinecurrencysymbol` This

command takes a single parameter for the currency code to use for automatically determining the currency symbol for prices. For example, USD or CAD will produce a dollar sign. Available currency codes are listed in the template and you can leave this command blank (i.e.

`\determinecurrencysymbol{ } )`

for no currency symbol. Alternatively, uncomment the line below this

Menu Content Commands

[Newest Templates](#)[LaTeX Typesetting Service](#)

Several custom commands are present in the template for outputting the different parts of the menu.

`\title` This command takes a single parameter for the top menu heading, automatically capitalized. It can only span one line so should be succinct.

`\menuitem` This command takes three parameters to create each of the menu items in the menu. The first parameter is the menu item title, which is automatically capitalized and can span multiple lines. Next is the price, which can be left empty if not required. Finally, the description, which can also be left empty. You may specify new lines manually in the description with the standard `\\`.

`\extrainfo` This command takes a single parameter for the extra information text at the bottom of the menu. Text entered will be italicized automatically. You may specify new lines manually with the standard `\\`.
